Introducción

LTH, marca líder de acumuladores en México, está consciente de las necesidades y exigencias del dinámico mercado de autopartes. Gracias a sus más de 80 años de experiencia, sabe que para que un motor logre su máxima eficiencia es importante que el vehículo cuente con componentes de la más alta calidad y tecnología.

LTH cuenta con una completa línea de filtros de servicio pesado y automotriz de excelente calidad, que aseguran una limpieza profunda para el óptimo funcionamiento del motor.

Si usted ya utiliza filtros LTH, ¡Felicidades!: puede estar tranquilo y seguro de haber elegido la mejor opción, ya que **son filtros diseñados y fabricados bajo especificaciones de equipo original**, sometidos a las más estrictas pruebas que aseguran su excelente calidad y desempeño.

Filtros Automotrices

Los filtros LTH protegen al motor tanto de los contaminantes que hay en el ambiente, como polvo, metales, materiales orgánicos, etc., como de los contaminantes que se generan dentro del motor, producto de la combustión y el desgaste.

Ventajas de los filtros LTH

- Gracias a su avanzada tecnología de producción, ofrecen una excelente calidad que se refleja en su desempeño.
- Cuentan con el respaldo de la marca LTH, la cual cuenta con más de 80 años de experiencia y liderazgo.
- Están diseñados de acuerdo a las especificaciones de cada vehículo y motor.
- Proporcionan mayor eficiencia de filtración gracias que están elaborados con componentes de la más alta calidad.
- Optimizan el rendimiento del motor, y por lo tanto contribuyen al **ahorro de combustible**.

Los filtros LTH contribuyen a mejorar el desempeño y alargar la vida útil del motor.

Filtros de Aceite

El aceite es el lubricante más crítico en cualquier vehículo automotor. Forma una película resbaladiza entre las partes móviles del motor, disminuyendo la fricción y reduciendo de manera considerable el calor, el desgaste y la pérdida de potencia.

Los filtros de aceite LTH retienen las partículas contaminantes provenientes del medio ambiente y las producidas por el motor, garantizando su óptimo funcionamiento al evitar que las partículas abrasivas perjudiciales provoquen su desgaste.

¿Por qué elegir filtros de aceite LTH?

- Contienen desde un 15% hasta un 60% más papel filtrante que otras marcas.
- Logran una mejor fijación al motor debido a que contienen mayor número de hilos en la rosca.
- Su soldadura en tapa y contratapa previenen fugas de aceite o desensamble.
- Cuentan con un diagrama reforzado que mantiene el filtro lleno de aceite, asegurando así su perfecta funcionalidad.
- Su altura de plisado, 20% mayor a la de otras marcas, aumenta la superficie de filtración e incrementa la vida útil del filtro.
- Contienen un resorte que asegura las partes internas del filtro con firmeza durante las variaciones de presión generadas por el funcionamiento del motor.
- Elaborados con lámina de mayor calibre, son filtros altamente resistentes a la fatiga, golpes y excesos de presión.

Componentes de los Filtros de Aceite

1. Malla de metal
2. Válvula de alivio
3. Tubo de lámina perforada
4. Papel filtrante
5. Válvula anti-retorno
6. Empaque

¿Por qué es importante realizar el cambio de filtro de aceite?

El cambio de filtro de aceite es fundamental para el funcionamiento correcto del motor. Debe hacerse en los períodos indicados en el manual del vehículo, para evitar consecuencias como:

- Aumento del consumo de combustible.
- Desgaste prematuro de las piezas del motor.
- Reducción de desempeño: si el filtro no se cambia cuando es debido, la válvula de seguridad puede abrirse, permitiendo que el aceite pase con todo e impurezas al motor.

Filtros de Aire

El motor de combustión interna requiere para su funcionamiento grandes cantidades de aire, mismo que debe estar listo para evitar efectos indeseables en el motor.

Los filtros de aire LTH garantizan la entrada de aire puro a la cámara de combustión, regulan la cantidad de aire aspirado y amortiguan del aire al momento de su ingreso.

¿Por qué elegir filtros de aire LTH?

- Cuentan con la aplicación de un clip metálico que asegura un sellado perfecto y evita el paso del aire sin filtrar al interior del motor.
- Están engargolados en la malla exterior, lo cual proporciona mayor rigidez durante la operación del vehículo y previene la deformación durante la compresión a la que son sometidos.
- El medio filtrante impregnado con aceite incrementa la capacidad del filtro, proporcionándole hasta 50% más de vida en comparación con un medio filtrante seco.
- Las propiedades mecánicas del material garantizan un sellado perfecto y mantienen las propiedades del filtro durante toda su vida útil.

¿Por qué es importante realizar el cambio de filtro de aire?

Si el filtro de aire no se cambia en el período indicado en el manual del vehículo, puede ocasionar:

- Aumento del consumo de combustible.
- Mayor contaminación originada por combustiones inadecuadas.
- Acelerado desgaste y pérdida de potencia del motor.

Componentes de los Filtros de Aire

1. Malla de metal
2. Marca flexible de plastisol
3. Papel filtrante de celulosa con resina fenólica
4. Marca flexible de poliuretano

FILTRO RADIAL

FILTRO DE PANEL

Filtros de Gasolina

La función de los filtros de gasolina LTH consiste en limpiar el combustible antes de que llegue a los sistemas de alimentación, ya sea de carburación o de inyección electrónica, evitando así la entrada de contaminantes contenidos en el mismo combustible, al motor.

¿Por qué elegir filtros de gasolina LTH?

- Cuentan con un sello de plastisol que evita el paso alterno de combustible sin filtrar hacia el sistema.
- Proporcionan filtración 100% confiable y máxima vida útil.
- Utilizan materiales resistentes a las altas presiones que provocan las bombas de gasolina en los sistemas electrónicos de inyección.

¿Por qué es importante realizar el cambio de filtro de gasolina?

El cambio de filtro de gasolina es fundamental para el funcionamiento correcto del motor. Debe hacerse en los períodos indicados en el manual del vehículo, para evitar consecuencias como:

- Fallas en el motor y escapes.
- Ineficiencia en el consumo de combustible.
- Bajo desempeño de la bomba de combustible y de los picos inyectores.

TIPO PLÁSTICO

TIPO METÁLICO

Componentes de los Filtros de Gasolina

TIPO PLÁSTICO

1. Vaso

Recomendaciones para el cambio de aceite y filtro

Primero, se debe de contar con las herramientas adecuadas y los conocimientos apropiados para realizar el cambio de filtro para aceite. En caso de no cumplir con lo anterior, lleve el vehículo a un taller mecánico y/o centro de servicio de confianza

para evitar daños y/o pérdida de tiempo.

1.- Estando el motor tibio y apagado, levante el cofre del auto y quite el tapón de admisión del aceite, bloquee el vehículo y levántelo, con las medidas de seguridad apropiadas.

Problemas más comunes del sistema lubricación

Es poco común que el sistema de lubricación presente problemas, pero cuando éstos ocurren por lo general se reflejan en el filtro de aceite. Los problemas más comunes y que se reflejan en el filtro de aceite son:

1. Filtro de aceite abombado o inflado: Cuando un filtro se abomba o se infla, nos indica que éste fue sometido a una presión excesiva fuera de lo normal, ya que los motores trabajan a una presión de entre 40-60 lb/in².

2. Filtro para aceite colapsado: filtro que ha sufrido aplastamiento del tubo central deformándose hacia el centro perdiendo su redondez original.

3. Filtro con fuga en el engargolado: Se presenta cuando el motor es arrancado después de la instalación. Puede ser causada por sobre apretar el filtro con herramienta para desmonte, lo que daña el ensamble.

4. Filtro con fuga por el empaque: Suele presentarse cuando el filtro es instalado y apretado normalmente, sin haber lubricado el empaque previamente.

5. Filtro vacío: puede presentarse por un desgaste excesivo de la bomba de aceite, si la válvula reguladora de presión se queda en posición abierta, o cuando la válvula de alivio del motor ha permanecido en posición abierta debido a la saturación del elemento filtrante.

Distribución y Servicio

*Una amplia red de distribución nacional enfocada
en brindarle el mejor servicio*

LTH, marca líder de acumuladores en México, cuenta con una extensa red de distribuidores y un profesional equipo Comercial y de Mercado.

Mediante personal altamente calificado, podemos brindarle la atención requerida y el mejor servicio.

Recuerde: no cualquier filtro puede ofrecerle el alto valor precio-beneficio que LTH le da, así como el respaldo de una marca con más de 80 años de experiencia al cuidado de su automóvil.

Garantía de los filtros LTH

Enertec México, S. de R.L. de C.V. garantiza cada filtro LTH contra cualquier defecto de fabricación o de sus materiales, durante el periodo de servicio recomendado por el fabricante del vehículo, y siempre que sea instalado según su correcta aplicación.

En caso de alguna reclamación por daños al motor, atribuibles a una posible falla en el filtro, Enertec México, S. de R.L. de C.V. a través de su personal calificado y autorizado, evaluará las causas del problema y definirá si son atribuibles o no al filtro, antes de proceder a cubrir cualquier reparación, misma que se limitará únicamente a devolver la condición del motor al momento anterior a presentarse la falla. Enertec México, S. de R.L. de C.V. no es responsable por otros daños o perjuicios.

Utiliza Lubricantes LTH, garantía de máxima protección,
seguridad y cuidado para tu automóvil.
